# WELCOME TO THE ITALIAN PAVILION

The **Italian Trade Agency (ITA)**, the **Embassy of Italy in Kuala Lumpur**, and the **Italian Ministry of Foreign Affairs and International Cooperation (MAECI)**, in collaboration with the **National Armaments Directorate (NAD)** and the **Italian Industries Federation for Aerospace, Defence and Security (AIAD)**, organised a collective participation in the 19th edition of Defence Service Asia Exhibition and Conference (DSA) 2026. The exhibition also incorporates National Security Asia 2026, the 4th edition of an international exhibition on national security in Asia.

Italy's defence industry actively engages in international collaborations and partnerships, contributing to multinational defence programmes and joint ventures across Europe and beyond. These efforts enhance technological innovation, promote interoperability, and strengthen defence capabilities at both regional and global levels.

At DSA 2026, the Italian Pavilion proudly showcases 12 outstanding Italian companies that excel in delivering top-notch products and services. These companies specialise in industrial partnerships within the defence and homeland security sectors, fostering the exchange of technology and know-how.

Additionally, the Italian Trade Agency (ITA) and the Italian Industries Federation for Aerospace, Defence and Security (AIAD) are readily available to provide support and assistance to professional visitors and government procurement delegations in their search for new products and technologies. Please feel free to reach out for any inquiries or guidance you may require.

## LIST OF EXHIBITORS:

# ITALIAN TRADE AGENCY (ITA)

**BOOTH NUMBER : 7300J & 7300F**

## COMPANY PROFILE:

ITA - Italian Trade Agency is the Governmental agency that supports the business development of Italian companies abroad and promotes the attraction of foreign investment in Italy.

In addition to its Rome headquarters, ITA operates worldwide through a large network of trade promotion offices, linked to Italian embassies and consulates.

ITA provides information, assistance, consulting, promotion, and training activities for the benefit of the Italian small and medium-sized companies and foreign companies as well.

ITA in Malaysia is the Trade Promotion Office of the Embassy of Italy in Kuala Lumpur. It covers a wide range of services, research of business partners, bilateral trade meetings, forum, and seminars with Italian experts, organising Italian pavilions at Malaysian major international trade fairs and exhibitions, accompanying local trade delegations to Italy and visits of industrial plants, etc.

# NATIONAL ARMAMENTS DIRECTORATE (NAD)

## COMPANY PROFILE:

The National Armaments Directorate (NAD) translates the Ministry of Defence's political, administrative and strategic dispositions into operational indications.

It aims at continuously improving the military instrument, both from a technological-industrial and a technical-administrative perspective. At the same time, the Italian Chief of Defense provides the NAD with technical and operational instructions concerning research and experimental activities, as well as the acquisition of weapon systems and material.

With regard to the overall planning of the military instrument, the NAD prepares, together with the Defense Staff, annual and multiannual planning proposals for defense industry and research activities

# ITALIAN INDUSTRIES FEDERATION FOR AEROSPACE, DEFENCE AND SECURITY (AIAD)

## COMPANY PROFILE:

The Federation of Italian Companies for Aerospace, Defence and Security (AIAD) was founded in 1947. It brings together virtually all Italian high-tech companies engaged in design, manufacturing, research, and service provision in the civil and military aerospace, naval & UW, land-based and all electronics and equipment capabilities connected to these sectors.

AIAD serves as a reference point for Italian and foreign institutions, coordinating activities in defence of national interests. It is a member of the Association of European Aerospace, Defence and Security Industries (ASD) and plays an active role in promoting the Italian industry by coordinating its participation in major international events and organising visits of foreign delegations to Italy.

AIAD is also a founding member of the National Aerospace Technology District. It is headquartered in Rome and has an office in Brussels.

## APEIROON

**BOOTH NUMBER : 7300J-C**

### COMPANY PROFILE:

Apeiroon develops next-generation private 4G/5G mobile networks designed for defense, public safety, and critical operations. Its solutions combine radio, core network, and mission-critical applications into compact, all-in-one units deployable in minutes from backpacks, vehicles, drones, or temporary sites.

Built for harsh and disconnected environments, Apeiroon's technology delivers secure, resilient, and high-performance communications with no reliance on fixed infrastructure. The modular architecture enables seamless integration with existing systems, including satellite and tactical networks, while ensuring interoperability with defense standards.

With proven deployments across defense forces and extreme environments, Apeiroon enables forces, robots, and assets to stay connected anywhere. The company is redefining tactical communications by providing sovereign, portable broadband networks that enhance operational effectiveness and decision-making in mission-critical scenarios.

# DAVI-PROMAU

BOOTH NUMBER : 7300J-E

# DAVI

## COMPANY PROFILE:

DAVI, manufacturer of the most sold plate and angle roll worldwide, produces plate roll to roll up to a thickness of 400mm as well as heavy duty angle roll for beams up to a height of 1,250mm and pipes up to 1,000mm. All the products are completely made in Italy.

DAVI has been awarded 'Prime Company' and given maximum commercial reliability by Dun & Bradstreet and received the Appreciation Award by NASA, thanks to the supply of two 'laser controlled' plate rolls for the Orion project.

Recently, DAVI completely redesigned its range of plate and angle roll to offer higher performance solutions for the heaviest applications but also to provide customized and fully automated machines for high productivity needs.

Furthermore, 'DAVI customer care' follows the client from installation and training up to online and telephone support, providing care by the most experienced technicians in the industry.

# ICS TECHNOLOGIES S.P.A.

**BOOTH NUMBER : 7300J-B**

## COMPANY PROFILE:

ICS Technologies, an Italian company with over twenty-five years of experience in the Maritime and Defense sectors, delivers high-quality products and customized solutions. Specializing in Coastal Surveillance, navigation radars, Advanced Electro-Optical systems, and Integrated Systems, our focus on excellence extends throughout our operations, especially in meeting the rigorous demands of the Defense industry.

Our vision revolves around providing top-notch performance to our customers. We leverage our extensive experience to offer cutting-edge technologies that are easily accessible, reliable, and affordable. Excellence is ingrained in our design, service, and commitment to customer satisfaction.

In system integration, we excel by combining Commercial Off-The-Shelf and military-standard equipment with bespoke software to deliver value-for-money turnkey solutions. By minimizing reliance on proprietary hardware and software, we ensure continuous performance updates and low lifecycle costs. Alongside our products, we offer a wide array of services tailored to meet specific customer needs.

# INVERNIZZI PRESSE S.R.L.

**BOOTH NUMBER : 7300F-E**

## COMPANY PROFILE:

Founded in the 1950s, Invernizzi Presse is an Italian engineering company specialized in advanced forming technologies and high-precision transfer press solutions. Built on strong mechanical expertise and decades of manufacturing experience, the company has evolved into a trusted international partner for demanding industrial sectors.

In the defence industry, Invernizzi Presse designs and manufactures transfer presses and dedicated production systems for cartridge cases and bullets for small and medium-calibre ammunition. Our solutions cover complete forming processes starting from strip or cup and are engineered to guarantee reliability, repeatability, and high production efficiency.

A key strength is our full in-house capability: we design and manufacture our own presses, tooling, and equipment, ensuring maximum process control and fully customized solutions tailored to each customer's requirements.

Beyond defence, our technologies are also applied in the aerosol, automotive, battery, metal packaging, cold forming, and deep drawing sectors, where precision, productivity, and process stability are equally critical.

With a team of 70 specialists, Invernizzi Presse operates globally, delivering engineering excellence and long-term industrial partnerships.

# M.E.RIN

**BOOTH NUMBER : 7300J-D**

BLADDER FUEL TANKS

## COMPANY PROFILE:

M.E.RIN Srl is an Italian specialist manufacturer of high-performance flexible and safety fuel tanks, established in 1994. Originally serving the motorsport sector, the company has grown into a recognised supplier for aerospace, defence, marine, and industrial applications.

With a strong engineering culture and certified quality standards, M.E.RIN designs and produces custom-made fuel tanks tailored to the specific requirements of each platform. Their capabilities include flexible fuel bladders, safety tanks, and configurations incorporating fire- and impact-resistant materials.

In the aviation and defence sector, M.E.RIN provides fuel-tank solutions suitable for aerospace applications along with armoured and military vehicles, where safety, survivability, and space optimisation are critical. Our customised tanks can incorporate technologies such as self-sealing layers, explosion-mitigation foam, and flexible structures, enhancing protection against leakage, fire, and ballistic threats.

Through advanced materials, precision manufacturing, and close collaboration with aerospace and vehicle OEMs and integrators, M.E.RIN delivers reliable, mission-ready fuel-storage systems that meet the demanding standards of modern civil and defence platforms.

# NOVAMARINE DEFENCE

**BOOTH NUMBER : 7300F-F**

## COMPANY PROFILE:

Novamarine Defence designs and builds high-performance RHIB platforms for governments entrusted with protecting lives, coastlines, and strategic waters. Entirely conceived and manufactured in Italy, each vessel is engineered as an integrated operational system in which hull, propulsion, structure, and onboard equipment work in complete harmony.

Our platforms are developed for real missions: patrol, interception, special operations, and search and rescue, with fully customizable layouts tailored to precise operational needs. At the core of every unit is Novamarine's closed-cell tubular structure, a structural element that delivers impact resistance, inherent buoyancy, stability, and control in severe sea conditions.

For more than forty years, our work has been shaped by one principle: a vessel must remain effective when the environment becomes uncertain and the mission cannot stop. Novamarine Defence offers more than performance. It delivers confidence to the institutions that serve at sea, and protection to the people who depend on them.
